PROFESSIONAL SUMMARY

Sustainability consultant with 5+ years leading decarbonization strategy, climate risk analytics and regulatory compliance engagements for Fortune 500 clients across automotive, BFSI and industrial sectors. Combines deep expertise in the GHG Protocol, CSRD/ESRS and NGFS scenario modelling with advanced analytics (Python, Power BI, VBA) to deliver actionable insight and measurable efficiency gains. Proven ability to lead discrete workstreams, coach junior analysts and develop reusable IP and tools that scale sustainability practice capabilities. MSc Climate Science & Policy; Big 4 consulting background (Deloitte, KPMG, PwC).

CORE COMPETENCIES

Sustainability & carbon	GHG Protocol, Scope 1/2/3, PCAF, SBTi, CSRD, ESRS, CDP, IFRS S1/S2, EU Taxonomy, TCFD, TNFD, SFDR, CBAM, EUDR, PPWR, GRI, SASB, ISO 14064, Verra, science-based targets, transition pathways, target setting, emissions benchmarking	Analytics & automation	Power BI, PowerPoint, Python (Pandas, NumPy), Advanced Excel (VBA, Power Query, Power Pivot), QGIS, CCalc2, NLP-based regulatory scanning, AI-enabled data quality checks, workflow automation
ESG platforms	IBM Envizi (certified), EcoVadis, Sustainalytics, CDP Insight, SAP S/4HANA Sustainability	Consulting & leadership	Case management, workstream ownership, analyst coaching and QA, IP development, stakeholder engagement, C-suite communication, benchmarking, scenario assessment, decarbonization roadmaps, gap analysis

PROFESSIONAL EXPERIENCE

Deputy Manager · Deloitte India, Gurugram

Assistant Manager, Deloitte India

JUN 2025 – PRESENT

FEB 2024 – MAY 2025

- Led the Double Materiality Assessment workstream for a Polish manufacturer under CSRD, evaluating **28 material topics across 150+ data points**. Built a VBA-automated Excel scoring tool adopted as the team standard, cutting delivery from six weeks to two (**67% faster**) and reallocating 40 analyst-hours to strategic advisory.
- Directed the climate risk workstream for a leading Indian tyre manufacturer, modelling transition and physical risks across **three NGFS scenarios** (SSP1-2.6, SSP2-4.5, SSP3-8.5) and three time horizons. Delivered board-level Power BI risk heatmaps and a strategy deck that informed **₹200Cr+ of capital allocation** toward flood resilience and heat adaptation.
- Spearheaded EUDR/PPWR readiness for a global FMCG client: mapped traceability across **12 supplier tiers**, identified eight circularity gaps and delivered a phased compliance roadmap that secured approval for a **€1.5M supply chain investment**.
- Built an automated emission factor database in Python/Excel for GHG inventory engagements across **10+ Fortune 500 clients** (semiconductors, automotive, BFSI); standardised Scope 1/2/3 calculations for 2.3M tCO₂e, improved PCAF data quality scores by two tiers and cut calculation time by 50%.
- Drove EU Taxonomy alignment for a European investment fund: built an Excel-based DNSH scoring matrix with automated PAI indicator quantification for 30+ economic activities, reducing assessment time by **40%** versus manual benchmarking.
- Quantified Verra VM0042 carbon credit feasibility for an agricultural client; validated a 12,000 tCO₂e baseline and additionality through leakage assessments, confirming viability for **\$500K+ in annual credit revenue**.
- Managed and coached three analysts per engagement; established QA protocols for GHG inventory calculations and ESG disclosure assessments, improving first-pass accuracy by 30% and reducing senior review time by 15 hours per month.
- Authored a 40-page IFRS S1/S2 readiness framework for the **Bank of Mauritius** evaluating eight local banks across three transition pathways; framework formally adopted by the regulator and cited in national sustainable finance policy guidance.

- Designed an eight-module ESG capability-building programme for **50+ consultants** covering BRSR Core, IFRS S1/S2, DMA and climate risk; reusable case-study IP achieved 85% knowledge retention and cut new-hire ramp-up by about three weeks.
- Performed ESG disclosure gap assessments for 12+ clients against ESRS, IFRS S1/S2 and ASRS; cross-mapped GRI, SASB, TCFD and CDP frameworks, identifying 25+ improvement areas per client.

Associate Consultant · KPMG Global Services, Gurugram

MAR 2023 – FEB 2024

- Calculated financed emissions for an asset manager (**\$1.8B AUM**, six funds, 200+ assets); built an Excel model with automated attribution using the PCAF methodology (data quality scores 1–5), cutting calculation time by 50% and enabling portfolio-level decarbonization target setting.
- Assessed climate risk for a technology conglomerate across four sectors under 1.5°C and 3°C NGFS scenarios; applied PESTEL analysis to produce C-suite risk registers that directly informed **\$80M of adaptation investment** prioritisation.
- Developed three supplier decarbonization handbooks covering 20+ technologies (solar, battery storage, green hydrogen) aligned with the client's science-based targets; adopted as the standard supplier engagement toolkit across procurement.
- Reviewed and provided feedback on 5+ junior analyst deliverables per quarter; contributed to internal ESG methodology documentation used across three concurrent engagements.

Consultant · PwC India, Gurugram

JUN 2022 – MAR 2023

- Supported a major steel and power producer in developing a high-level decarbonization pathway focused on process improvement and technology integration aligned with its Net Zero objective.
- Supported a leading South Asian oil and gas company in developing a green transition roadmap by identifying key emission hotspots and assessing decarbonization levers aligned with its business outlook and available technologies.
- Helped an international oil major understand the regulatory landscape for biofuels, plastic waste export and production of pyrolysis oil from plastic waste, and evaluated state government incentives for waste management activities.
- Built internal competencies through thought leadership on climate finance, carbon markets and offsetting mechanisms; supported business development through tender tracking, workshops and bid documents.

RESEARCH & EARLY EXPERIENCE

Net Zero Targets: From India's Perspective

Research project · TERI School of Advanced Studies

Desk-based study of the technological and political feasibility of India's 2050 net zero position, assessing the pace of hydrogen, biofuels, EVs, solar, wind and hydro in India's decarbonization strategy.

Feasibility of Hydrogen Fuel Cell Vehicles in India

Research project

Assessed the feasibility of HFCV uptake based on consumer perception, awareness and preference using statistical tools.

Research Intern · Emergent Ventures India

Feb 2022 — May 2022

Market research on domestic carbon market mechanisms across developing nations; demand-supply dynamics of mitigation outcomes and opportunities to source nature-based solutions globally.

Live Project Intern · GAIL India Limited

Sep 2021 — Dec 2021

Life cycle assessment of polyethylene and polypropylene products and benchmarking research supporting GAIL's Net Zero plan.

Live Project Intern · Aseries Envirotek India

Jun 2021 — Sep 2021

Prepared the maiden GRI-aligned sustainability report for an Assam-based petrochemical company.

IBM Envizi ESG Suite Technical Sales Advanced

Certification · 2024

Granular ESG data management using analytics, reporting and planning tools to support decarbonization and regulatory disclosure.

EDUCATION

MSc Climate Science and Policy

TERI School of Advanced Studies, New Delhi · 2020 — 2022

CGPA 8.69

BSc (Honours) Botany

S.G.T.B. Khalsa College, University of Delhi · 2017 — 2020

CGPA 8.23 · DIV I

AISSCE (CBSE), Greenway Modern School, 2017: 91.4% · AISSE (CBSE), Army Public School, 2015: 91.2%
